ARCTIC

UBER COOL COLLECTION

GENTLE

FACT

BENEFIT

Thermoplastic Elastomer (TPE) Layer

Provides targeted support, pressure relief, and enhanced breathability, promoting a cool and comfortable sleep environment while maintaining durability and flexibility.

Gentle Feel

For a gentle feel, the Ultra High-Density V-Cut Foam Layers are crafted to lightly contour to your body while maintaining balanced support—offering a soothing sleep surface that blends softness with stability.

650gsm Cool Gray Knit

Soft, breathable fabric that offers a premium, cooling feel while helping to regulate body temperature for a more comfortable night's sleep.

Copper Interpolated Plush VISCO BREATHE sides

Copper Interpolated Gel Foam, Natural Latex, and Hyper Soft polyurethane layers enhance sleep quality by improving magnetic fields, regulating temperature, detoxifying, reducing inflammation, and providing plush, supportive comfort.

Hand-Nested Pocket

The pocket springs are individually packed by hand in a honey comb configuration giving a 30% greater spring count and support.

Foam Encased

The spring unit is encased in a high density firm polyurethane foam as a reinforced edge support.

Minimal Transfer

The Pocket Spring unit, being individually packed and glued together limits the movement transfer and your partner will not be disturbed if you toss and turn.

Electronically Tempered

The pockets spring units are electronically tempered for more rigidity and to ensure a minimal compression set.

Open cell technology

VISCOSE BREATHE blue gell is manufactured with an open cell structure which allows for ventilation ensuring an ultra hygienic sleep environment.

Hygienic & Non Toxic

All foams used in the manufacturing process are produced in-house at Strandfoam Group and is completely stable, non-toxic and Hygienic.

Dual sided

The ARCTIC FIRM offers the benefit of dual sleeping surfaces for prolonged comfort and support.
