BENEFIT

Luxurious High-Quality Knitted Fabric

Designed to act as an effective moisture barrier. Boast anti-bacterial properties that significantly extend the life of your mattress. Featuring advanced breathability and anti-microbial qualities, they ensure optimum heat dissipation.

High density buoyant Polyurethane virgin foam layers

High-density, buoyant polyurethane virgin foam layers that provide excellent spinal support and a gently firm, luxurious feel. Dual comfort technology allows you to choose between firm and gently firm options, tailoring the mattress to your preferred level of comfort and support.

High density Virgin Foam posture support core

High density Virgin Foam provides an unmatched cell-support structure and maximum durability for a long lasting and comfortable nights rest.

Precision engineered Airflow Technology.

The core structure inside the Slomotion beds have been precisely engineered with airflow channel technology that allows optimal breathability for added temperature regulation.

Key-hole structural design with Unique Hip Support Technology

The intelligently designed airflow channels have been engineered to compress in a way that supports and molds to the contours of your body and sleeping position providing the ultimate sleeping experience.

Zero movement transfer

This mattress offers zero movement transfer through Cloud Nine's advanced posture support structure; This means that you will no longer disturb sleeping partners.

Hygienic & Non-Toxic

The foam used in every Cloud Nine mattress is made to be completely stable, non-toxic and hygienic.

Adjustable Base with Head and Foot Elevation

The ability to adjust your head upright and improve airflow through your nasal passages with a simple "click" can improve sleep quality, reduce snoring, and provide relief from back pain. Elevating the head only a few degrees can also lessen the effects of congestion from allergies or a cold and offer easier breathing. Raising the feet relieves lower back pressure, improves circulation, and reduces swelling, enhancing overall comfort and health.

Zero-G Position

Especially when using the Zero-G position, Slomotion adjustable bases provide relief from lower back pain and reduce pressure on the vertebrae.
